In my current role as Deputy Manager - IT Front-End at Tefugen Technologies Private Limited, I am responsible for managing and leading the entire front-end development team. My primary duties include organizing and overseeing the activities of multiple projects, ensuring that they are delivered efficiently and meet all quality standards. I have successfully handled three major projects, working closely with various stakeholders to ensure alignment with business goals and client expectations.

I leverage a diverse range of technologies, including:

- JQuery, JavaScript, and AJAX: For developing dynamic and responsive web applications.
- Shopify: For building tailored e-commerce platforms.
- WordPress: To create and manage scalable content management systems (CMS).

- **PHP with Laravel:** For crafting secure and scalable back-end systems, ensuring smooth integration with the front end.
- **Ionic Framework:** For developing hybrid mobile applications, enabling cross-platform compatibility and a seamless user experience across Android and iOS devices.

This position has allowed me to enhance my project management skills and technical expertise, ensuring successful project outcomes and contributing to the company's growth.

CICD

As a Senior Software Engineer at i-exceed Technology Solutions, I was responsible for customizing and developing banking solutions to meet client-specific requirements within the banking sector. My role involved full-stack development, collaborating with a team of 8 developers to ensure the successful delivery of scalable and efficient applications.

Key responsibilities included:

- **Front-End Development:** Creating responsive and user-friendly interfaces using HTML, CSS, JavaScript, Bootstrap, and JQuery.
- **Back-End Development:** Developing and maintaining Java Spring Boot microservices to handle complex business logic and ensure smooth application performance.
- **API Integration:** Developing integrations to connect with Bank FlexQube APIs, enabling seamless data exchange and functionality between systems.
- **API Creation and Maintenance:** Designing, developing, and managing RESTful APIs to support internal and external services.
- **Database Management:** Utilizing Oracle databases for efficient data handling, ensuring optimized storage, security, and performance and managed application datasource for all SIT,UAT and Production Environments.
- **Server Application Management & Deployment:** Overseeing server applications and deploying solutions using Oracle WebLogic, ensuring smooth transition and functionality in both UAT and production environments.
- **UAT and Production Support:** Providing comprehensive support during User Acceptance Testing (UAT) and production deployment phases, addressing any performance and functionality adjustments as needed to ensure a smooth launch.
- **Version Control:** Employing GitLab for version management, ensuring collaboration, code integrity, and efficient project tracking.

In this role, I played a crucial part in delivering customized banking solutions, managing the full lifecycle of development from front-end design to back-end integration and server deployment, contributing to the success of our banking clients.

As a Senior Software Developer at Amrita Vishwa Vidyapeetham, I am responsible for full-stack development, working with a small team of three to create and maintain end-to-end web applications. My role involves a wide range of responsibilities, including new development, maintenance, and project management.

Key responsibilities include:

- **Full-Stack Development:**
 - Developing dynamic web applications using HTML, CSS, JavaScript, Bootstrap, and JQuery for front-end interfaces.
 - Utilizing PHP with the Laravel Framework and Composer plugins for back-end development, including API creation and maintenance.
 - Designing and implementing various modules, including the integration of an online payment system and its management.
- **Maintenance of Existing Applications:**
 - Managing and maintaining the existing website using Drupal CMS, ensuring smooth operation with the current theme and overall site administration.
- **Database Management:**
 - Working with MySQL for database design, management, and optimization to support web application functionality.
- **Version Control:**
 - Utilizing a self-hosted GitLab instance for version control, ensuring effective collaboration and project tracking within the team.

In this role, I play a key part in the continuous development and maintenance of critical in-house applications, contributing to the university's digital infrastructure 4 Campus of 7 by ensuring robust, secure, and user-friendly solutions.
